Paper 01 Business Behaviour

edexcel 

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Section A: Essay questions

NB: Use levels based mark scheme (20 marks) to mark this section.

Question Number	Answer	Mark
1	<p>Indicative content</p> <p><u>The size of the market may be a major constraint on growth because:</u></p> <ul style="list-style-type: none"> • Lack of scope for growth within the market • Many other firms are competing in the market • New entrants in the market - market share is falling • The market is small - localised market, niche etc. • The market is shrinking - falling demand (leftward shift in demand curve) <p><u>Other constraints</u> may also be important to the business</p> <ul style="list-style-type: none"> • The objectives of the owners/managers <ul style="list-style-type: none"> • Owner(s) may be satisfied with keeping the business small – growth is risky, expensive, time-consuming etc. Profit satisficing • Lack of managerial skills • The macroeconomic climate <ul style="list-style-type: none"> • Slow growth or recession in the economy • Low effective demand, low consumer purchasing power • Future uncertainty in the economy – economic, political etc. • High interest rates • High inflation rates • High unemployment rates 	

- **Government legislation/regulations**
 - Laws on mergers/takeovers
 - Red tape
- **High costs of growth**
 - legal and administration costs
 - costs of merger or takeover bids
- **Lack of availability of required labour**
- **Limited access to finance -**
 - relatively small amount of retained profits
 - banking sector may be unwilling to lend
 - small firms have fewer options when raising external finance

Evaluation

Size of market may **not** be a major constraint on business growth because:

- The market is growing - increased market demand (rightward shift in demand curve); new product with considerable scope for market growth
- The business is content to operate within a market niche - applies particularly to small firms
- The business is able to expand its market through marketing - advertising, branding, promotion
- The business is a monopolist and controls the market
- The business can grow by merger/takeover
- The business is a conglomerate operating in different markets to avoid the constraint of any one market
- The business is a TNC operating internationally to avoid limitations in the size of any one national market

**Other constraints may also be evaluated
Candidates may take either perspective for KAA and the reverse perspective for evaluation.**

Question Number	Answer	Mark
2	<p>Indicative content</p> <p><u>Definitions:</u></p> <ul style="list-style-type: none"> • Average Cost of production - total cost/output • Price = Average Revenue - total revenue/output • Shut down point - where the firm cannot cover its costs • Distinction between fixed and variable costs • The decision on whether to shut down or not depends on whether losses arise in the short run or long run • The firm may stay in business in the short run as long as AVC is covered. A contribution may be made towards covering fixed costs <p>SHORT RUN Monopoly (monopolistic competition) diagram showing loss</p> <p>At $MC = MR$, (output Q_2), the firm is not covering AVC and will shut down</p>	

Perfect competition diagram

- At output OQ the firm can survive as it just covers its AVC at price P
- In the short run, if price (AR) is below AVC the firm will shut down

LONG RUN

- In the long run, if AR is below ATC then the firm will shut down (the firm is making a loss or earning less than its normal profit $AR \leq AC$)
- In the long run survival depends on making at least normal profit ($AR = AC$), so loss makers will exit the industry. So shut down point is anything below normal profit ($AR = AC$)
- Perfect competition & monopolistic competition - firms would need to profit maximise ($MC = MR$), in the long run to avoid losses

Evaluation

A firm may be able to price below AC because:

- It is a monopolist and deliberately selling at below its AC i.e. a predatory pricing strategy to eliminate rivals from the market
- Financial support is provided by the government - e.g. grants, subsidies
- It is in the public sector and is financed by the government
- It receives cross-subsidies as it is part of a conglomerate or group of companies
- It is a start-up business and so some time is required before it expects to make a profit as it becomes more established in the market and revenue rises

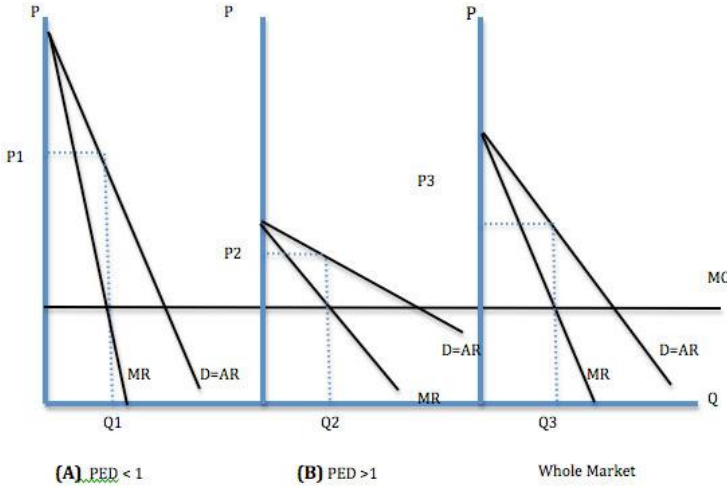

In the long run the firm manages to reduce its costs e.g. improving productivity

In the long run the firm successfully increases revenue

For private sector firms the distinction between short and long run is critical. Most are likely to shut down in the long run if costs are not covered

Candidates may take either perspective for KAA and the reverse perspective for evaluation.

(20)

Question Number	Answer	Mark
3	<p>Indicative content</p> <p>Define price discrimination (third degree) – where a firm is charging different prices to different users for the same product/service</p> <ul style="list-style-type: none"> • Conditions necessary for price discrimination: <ul style="list-style-type: none"> -monopoly power -different PED's for different consumer groups -supplier is able to split, and maintain separation of, the distinct consumer groups • Examples – airlines, railways, energy providers, cinema tickets  <p>Diagrammatic analysis (assuming profit maximisation)</p> <ul style="list-style-type: none"> -Output Q1 and higher price P1 where demand is inelastic -Output Q2 and lower price P2 where demand is elastic -Higher total profit (from markets A and B) when compared with whole market <ul style="list-style-type: none"> • Consumers with inelastic demand will be paying higher prices - (Market A) e.g. transport or energy costs at peak times 	

	<ul style="list-style-type: none"> • Extraction of consumer surplus to increase producer surplus • A significant number of different prices can be confusing and potentially costly for consumers who may inadvertently not choose the lowest price – problem of asymmetric information • More market power of incumbent firm(s) may result in higher barriers to entry and prevent/restrict competition • Monopoly firm less likely to invest/increase efficiency because of complacency and lack of competition <p>Evaluation</p> <ul style="list-style-type: none"> • Consumers with elastic demand will be paying lower prices (Market B) e.g. travellers during off peak times, student discounts • More choice of products/service – e.g. makes it financially viable for the firm to supply goods/services during off peak times • Higher profits may encourage further investment by firm which can improve quality and possibly lower prices • The opportunity to cross-subsidise • The firm’s ability to price discriminate will be diminished where: <ul style="list-style-type: none"> - there are price controls set by regulatory bodies -there is media/consumer groups/government pressure opposing price discrimination - new firms enter the market <p>Candidates may take either perspective for KAA and the reverse perspective for evaluation.</p>	<p>(20)</p>
--	--	--------------------

Question Number	Answer	Mark
4	<p>Indicative content</p> <p>Forms of government intervention to protect employees may include:</p> <ul style="list-style-type: none"> • Equal opportunity laws – equal pay, anti-discrimination • Employment rights – part-time employees’ rights, maternity & paternity leave, holiday entitlements, redundancy etc. • Health & safety laws and regulations • Minimum wage legislation <p>Impact on business behaviour:</p> <ul style="list-style-type: none"> • Business objectives may alter e.g. – more emphasis on social responsibility • In relation to legislation, businesses will need to conform with the law which may involve having to make adjustments or changes to current employment practices: <ul style="list-style-type: none"> - rights for disabled workers - fairer recruitment processes - improved safety procedures - increase in wage rates <p>Any of the above may lead to increased costs for businesses</p> • Impact of rising costs may be: <ul style="list-style-type: none"> - businesses raise prices - substitute capital for labour - reduce profit margins - reduce other costs - reduce investment - relocate to economies with less government intervention • May be a rise in business corruption, unofficial business activity to avoid tougher laws 	

Evaluation

- Reputation of the business may be enhanced for those businesses which conform with the legislation and demand does not fall despite higher prices
- Legislation applies to competitors as well, so may be no loss of market share
- Depends on the extent of the change required – for some businesses the impact may be slight
- Rising costs may be offset by a rise in labour productivity due to improved pay/conditions/employment opportunities. Hence little or no rise in unit labour costs
- Depends on the influence of trades unions and other employee organisations
- Depends on the extent to which laws and regulations are being enforced by the government
- Short term/long term impact on business behaviour

Section A Questions: Performance Criteria for Mark base 20

Level 0	0	<ul style="list-style-type: none"> • No rewardable material
Level 1	1-4	<ul style="list-style-type: none"> • Displays knowledge presented as facts without awareness of other viewpoints • Demonstrates limited understanding with little or no analysis • Attempts at selecting and applying different economic ideas are unsuccessful • Material presented is often irrelevant and lacks organisation. Frequent punctuation and/or grammar errors are likely to be present and the writing is generally unclear.
Level 2	5-8	<ul style="list-style-type: none"> • Displays elementary knowledge of well learnt economic facts showing a generalised understanding together with limited analysis i.e. identification of points or a very limited discussion • Displays a limited ability to select and apply different economic ideas • Material presented has a basic relevance but lacks organisation, but is generally comprehensible. Frequent punctuation and/or grammar errors are likely to be present which affects the clarity and coherence of the writing overall.
Level 3	9-12	<ul style="list-style-type: none"> • Displays knowledge and understanding of economic principles, concepts and theories as well as some analysis of issues i.e. answer might lack sufficient breadth and depth to be worthy of a higher mark • Shows some ability to apply economic ideas and relate them to economic problems • Employs different approaches to reach conclusions • Material is presented with some relevance but there are likely to be passages which lack proper organisation. Punctuation and/or grammar errors are likely to be present which affect the clarity and coherence.
Level 4	13-16	<ul style="list-style-type: none"> • Displays a good knowledge of economic principles, concepts and theories together with an analysis of the issues involved • Demonstrates an ability to select and apply economic ideas and to relate them to economic problems • Evidence of some evaluation of alternative approaches leading to conclusions • Material is presented in a generally relevant and logical way, but this may not be sustained throughout. Some punctuation and/or grammar errors may be found which cause some passages to lack clarity or coherence.

Level 5	17-20	<ul style="list-style-type: none">• Displays a wide range of knowledge of economic principles, concepts and theories together with a rigorous analysis of issues• Demonstrates an outstanding ability to select and apply economic ideas to economic problems• Evaluation is well balanced and critical leading to valid conclusions• Material is presented in a relevant and logical way. Some punctuation and/or grammar errors may be found, but the writing has overall clarity and coherence.

Section B: Data response

Question Number	Answer	Mark
5 (a)	<p>Knowledge and Application (up to 4 marks)</p> <p>Knowledge – up to 2 marks</p> <p>Oligopoly (1)</p> <p>With one characteristic of oligopoly for development mark e.g. Small number of dominant large firms (1)</p> <p>Interdependence of firms (1)</p> <p>There may or may not be a large number of smaller firms (1)</p> <p>Any other valid knowledge point (1)</p> <p>Application – up to 2 marks</p> <p>4 dominant firms in the industry (1)</p> <p>Each one of the four largest firms have similar market shares (1)</p> <p>Calculation of concentration ratio: 3 firm 54% 4 firm 69% (2 marks for one accurate calculation)</p> <p>Rest of the smaller firms have 31% between them (1)</p> <p>Any other valid application point - up to 2 marks</p>	<p style="text-align: right;">(4)</p>

Question Number		Mark
5 (b)		(12)
Knowledge, application and analysis – indicative content		
	<p data-bbox="491 336 976 374">NAI may be able to compete by:</p> <ul style="list-style-type: none"> <li data-bbox="443 409 1166 546">• Offering different routes than the established airlines - providing more choice and convenience to consumers. Direct flights to smaller US cities <li data-bbox="443 584 1171 656">• Competing on price - cheaper flights than the larger airlines <li data-bbox="443 694 1206 1081">• Keeping costs of production down allow even lower prices to lead to profitable operations <ul style="list-style-type: none"> <li data-bbox="491 797 1206 869">- smaller aircraft, which are cheaper to buy and to operate <li data-bbox="491 907 1171 978">- keeping wage costs down by being based in Ireland <li data-bbox="491 1016 1142 1088">- offering a basic service to passengers e.g. meals, comfort, onboard entertainment <li data-bbox="443 1120 1114 1158">• Having lower sunk costs - smaller aircraft <li data-bbox="443 1196 1155 1294">• Once NAI gains a foothold in the market its reputation may grow which will attract more consumers <li data-bbox="443 1332 1174 1404">• Possible support from government authorities to improve contestability in the market 	

Level	Marks	Descriptor
0	0	A completely inaccurate response.
1	1-3	Shows some awareness of how a small firm may compete. Material presented is often irrelevant and lacks organisation. Frequent punctuation and/or grammar errors are likely to be present and the writing is generally unclear.
2	4-6	Understanding of how a small firm may compete with some application to context. Material is presented with some relevance but there are likely to be passages which lack proper organisation. Punctuation and/or grammar errors are likely to be present which affect the clarity and coherence.
3	7-8	Clear understanding of how a small firm may compete with effective application to context. Material is presented in a relevant and logical way. Some punctuation and/or grammar errors may be found, but the writing has overall clarity and coherence.

Evaluation – indicative content		
	<ul style="list-style-type: none"> • NAI currently has a very small market share with just 1% of aircraft in the transatlantic market • Despite a reduction in sunk costs small airlines still face high fixed costs in setting up an airline firm e.g. buying planes, training staff. Significant economies of scale in this industry may not be achievable for a small business • The demand for a limited service airline may be very small on long haul flights • The threat of new competitors acts as a pressure on the larger airlines to: <ul style="list-style-type: none"> - lower prices - become more efficient - offer better service to customers • In the long run the small airlines may find it difficult to survive 	
Level	Marks	Descriptor
0	0	No evaluative comments.
1	1-2	For identifying evaluative comments without explanation.
2	3-4	For evaluative comments supported by relevant reasoning.

Question Number		Mark
5 (c)		(12)
Knowledge, application and analysis – indicative content		
	<ul style="list-style-type: none"> • Definition of collusion – incumbent firms agreeing to restrict competition (formally or informally) • Collusion can be tacit (e.g. price leadership) or overt (e.g. price fixing). Extract 2 suggests price fixing • May be a rational strategy for airline firms to: <ul style="list-style-type: none"> - Keep air fares artificially high (removing unprofitable flights and slowing growth) - Achieve higher net profit margins - twice as high as the world average - Satisfy their biggest shareholders - Avoid price competition/price wars - Create more entry barriers to make the market less contestable (new entrants 'actively discouraged') - Achieve a more secure and larger market share - Maximise joint profits by restricting airline capacity - It may be rational if any potential fines and legal costs are likely to be lower than the extra profit gained 	

Level	Marks	Descriptor
0	0	A completely inaccurate response.
1	1-3	Shows some awareness of the reasons for collusive behaviour. Material presented is often irrelevant and lacks organisation. Frequent punctuation and/or grammar errors are likely to be present and the writing is generally unclear.
2	4-6	Understanding of the reasons for collusive behaviour with some application. Material is presented with some relevance but there are likely to be passages which lack proper organisation. Punctuation and/or grammar errors are likely to be present which affect the clarity and coherence.
3	7-8	Clear understanding of the reasons for collusive behaviour with effective application to context. Material is presented in a relevant and logical way. Some punctuation and/or grammar errors may be found, but the writing has overall clarity and coherence.

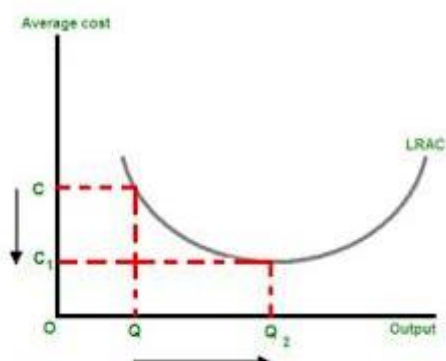

Evaluation – indicative content		
	<ul style="list-style-type: none"> • Collusion has led to US Government investigation • The investigation may result in huge fines being imposed • Airlines face high legal costs • Collusion may be difficult to sustain in the long run – firms may ultimately break away and charge lower prices • Adverse publicity following investigations could cause longer term damage to the reputation of airlines and lead to a fall in consumer demand <p>Candidates may take either perspective for KAA and the reverse perspective for evaluation.</p>	
Level	Marks	Descriptor
